EXISTING CENTERS

Centers are the middle, core or heart of an area. It is a point of activity and vitality. Centers come in many sizes and have different purposes or activities within. They may have endangered species habitat or aquifer recharge areas that require additional standards and consideration relating to future growth. It is envisioned that all centers be walkable, connected, and have a mix of uses. These centers must provide adequate infrastructure to support the commercial development present especially mobility and access for pedestrians, bicycles, vehicles and transit. Given the mixed-use nature of these centers, parking should be shared and not detract from the aesthetic of the area.
