This request for a Special Use Permit (SUP) to allow outdoor music was postponed upon request from the applicant during the January 5, 2021 Planning Commission meeting to allow time for discussions with surrounding residents. Additional information provided by the applicant is included in Attachment 4.

The 1.185-acre subject property is located south of Loop 337 on the east side of Gruene Road. The site is developed with a 1,216 square foot residential structure that was constructed in 1968. The applicant would like to convert the house to commercial restaurant use and is requesting approval of a Special Use Permit (SUP) to allow the potential future restaurant to have live outdoor music.

Their plan is to extend a covered outdoor patio from the rear of the building. The conceptual site plan shows a total of 20 tables arranged with six tables within the enclosed dining room and restaurant, nine tables under the covered patio, and five open air tables with space for live music performances.

To protect the quality and enjoyment of private residential property, Section 5.3-4 of the City's Zoning Ordinance prohibits outdoor music when adjacent to single-family residential and duplex zoning and land uses. The subject property is adjacent to single-family residential uses to the south and east. In addition, the site is adjacent to the 124-unit Ranch at the Guadalupe apartment complex that was constructed in 2017.

Neighboring C-1 zoned property to the south with frontage on Gruene Road is developed with similar era single-family homes on large lots that were platted as the Rio Vista Addition in 1934. The surrounding neighborhood is well-established and stable. Property to the east is also part of the Rio Vista Addition. This area is zoned R-2 (Single-family and Two-family) and is developed with single-family homes. Property to the north is zoned C-1 and developed with a large apartment complex.

While the Zoning Ordinance includes the aforementioned residential protection provision, the purpose of the SUP process is to provide an opportunity for site-specific consideration of certain uses or activities that might otherwise be incompatible with adjacent uses or existing land use patterns. As SUPs are conditional zoning overlays, they can be approved with conditions to achieve compatibility and protect neighboring properties.

Surrounding Zoning and Land Use:

North - C-1 / Multifamily

South - C-1 / Single-family and two-family dwellings

East - R-2 / Single-family and two-family dwellings

West - Across Gruene Road and Union Pacific Railroad, M-1 / Commercial and agricultural

Determination Factors:

In making a decision on zoning, the following factors are to be considered:

- Whether the permitted use will be appropriate in the immediate area and the relationship of the use to the surrounding area and to the City as a whole. *(The subject property is at the perimeter of an established residential area of single-family homes, apartment dwellers, and rural residential properties. Without sound mitigation measures, allowing outdoor music could introduce an incompatible land use to adjacent residents. The site appears capable of accommodating the required number of parking spaces. Parking, landscaping, and other site development standards will be reviewed for compliance during site plan review of the necessary commercial permit.)*
- Whether the zoning change is in accord with any existing or proposed public schools, streets, water supply, sanitary sewers, and other utilities to the area. *(The proposed use does not appear to conflict with any of these elements. Although, site utility upgrades may be identified during the house conversion and site plan process.)*
- How other areas designated for similar development will be affected. *(Allowing outdoor music would not likely affect nearby areas designated for similar development.)*
- Any other factors that will substantially affect the public health, safety, morals, or general welfare. *(The use of outdoor music could negatively impact the health and general welfare of the public in neighboring residential areas.)*
- Whether the request is consistent with the Comprehensive Plan: *see below*

ADDRESSES A NEED/ISSUE IN A CITY PLAN OR COUNCIL PRIORITY:

City Plan/Council Priority: Envision New Braunfels Comprehensive Plan	Action 3.3: Balance commercial centers with stable neighborhoods. Action 3.6: Proactively provide a regulatory environment that remains business and resident friendly. Future Land Use Plan: The property is situated in the New Braunfels Sub-Area and along a Transitional Mixed-Use Corridor.
--	--

FISCAL IMPACT:

1. If approved, the City's Code Compliance Division might be frequently called to enforce compliance with the SUP, due to the numerous homes in close proximity. This may have a financial impact on the Division's budget and resources.
2. If approved, the City's Police Department might be called to investigate noise complaints and frequently measure decibel levels pursuant to the City's Noise Ordinance (Section 82-9), which may have a financial impact on the Department's budget and resources.

STAFF RECOMMENDATION:

Outdoor live music appears inappropriate at this location for the following reasons:

1. The property is surrounded on three sides by existing, stable residential uses. The conceptual site plan shows the music stage oriented toward the apartment complex. Given the difficulty of controlling noise trespass, it is assumed that the use will create a nuisance for surrounding single-family and multifamily residents.
2. The applicant has not yet provided information regarding noise mitigation, or specific measures to minimize disruptions to neighbors. Per Section 82-9 of the City's Code of Ordinances, the maximum decibel level permissible for any type of sound emitted from a property that is located within 100 feet of a residential district is 85 decibels between 10:00 AM to 10:00 PM and 75 decibels at all other times.

Therefore, staff recommends denial. However, if Planning Commission is inclined to recommend approval, staff recommends the SUP include conditions. Examples of noise mitigation measures that have been suggested for similar projects and appropriate for consideration at this location include:

1. Require an acoustic shell for the stage that directs sound away from residences.
2. Set a size limit for the stage.
3. Limit live music to acoustic performances.
4. Limit performance hours.
5. Limit the days of the week that performances occur.
6. Specify rules for playing recorded music through outdoor speakers.
7. Increase site screening and landscaping requirements.
8. Require onsite monitoring and record keeping of decibel levels by the business owner.

Notification:

Public hearing notices were sent to 10 owners of property within 200 feet. The City has received no responses in favor and seven responses in objection (# 1, 2, 3, 4, 6, 7, 8) to the request. Opposition represents more than 20% of the notification area. Pursuant to state statute, a $\frac{3}{4}$ majority of City Council (6 votes) will be required for approval of the applicant's request unless that opposition changes. Staff received an additional 2 written responses from outside the 200-foot notification area.
